

I discern less diversity in the availability of moderator/host opinions on talk radio programs in the Philadelphia PA area. I believe that there is more syndication of such talk radio programs. I would not like to allow the ability for increased ownership of communication properties by communication companies, since I believe it will lead to more concentration of ownership and less diversity of opinion and information. I would not like to allow the ability to own radio and newspaper companies by the same entity, since I believe that it will limit the dissemination of information to the public. I support less concentration of broadcast ownership.

Thank you for this convenient email method to share my views.
